

BRIDGEIT: The Ultimate Bridge-Making Showdown

BRIDGEIT is a thrilling competition that challenges participants to design and construct bridges that not only bear heavy loads but also withstand seismic forces.

Event Structure :

Team Size : Maximum 2 participants per team.

Competition Format :

Round 1 : Bridge making(Offline)

Rules:

1. Each team will be supplied with construction materials and necessary tools to build their bridge. No external materials or tools are allowed.
2. Teams will have two hours to construct their bridge within the given constraints.
3. Completed bridges will be tested on a shaking table to evaluate their stability under simulated seismic conditions.
4. Bridges will undergo a static load test using calibrated weights to assess their structural strength and load-bearing capacity.
5. Scores will be assigned based on performance in load tests and seismic simulation.

Prizes:

- 1st Prize: worth ₹4,000
- 2nd Prize: worth ₹2,000
- 3rd Prize: worth ₹1,000

Why Join?

Join Bridgelt to test your engineering skills in a hands-on challenge where you design and build a bridge under real-world constraints. Compete against teams to create the strongest and most resilient structure, tested for seismic stability and load-bearing capacity.
